Save The Woodstown Viking Site

To the Minister for the Environment, Dick Roche

We the undersigned:

- Call on the Minister for the Environment to order the full excavation of the Woodstown Viking Site and not a partial or rescue excavation
- That this excavation should be done by hand and without the use of heavy machinery
- If necessary, the route of the Waterford bypass to be excavated first, facilitating the construction of the bypass without re-routing or significant delay
- The state to bear the cost of the excavation
- Once the site has been excavated, an interpretative centre/education facility to be constructed near the site
